Manipulatives

ALGEBRA/DECIMAL INSERT KIT

## What's in the box?

- 20 red hundredths blocks

- 15 blue snap-in strips

- 15 gray snap-in strips

- 4 green snap-in squares

- 4 red snap-in squares

## What are Math-U-See Manipulatives?

Math-U-See is a unique program that is "built around the block," presenting mathematical concepts so that students can easily visualize and understand them. Research shows that learning math with manipulatives deepens understanding, increases retention, and makes math more interesting for students of all ages. While many programs utilize manipulatives in early learning, Math-U-See continues using them into the high school levels to illustrate higher-level concepts in algebra and geometry.

Our colorful Algebra/Decimal Insert Kit is used with the Integer Block Kit\* to extend student learning and understanding beyond the elementary levels. No matter what curriculum is being used, students will benefit from interacting with these simple but versatile tools for understanding math.
